Bug Report - Websites.co.in

1. reCAPTCHA Failure

Steps to Reproduce: Go to registration page > fill out form > click Register

Expected vs Actual: Expected: reCAPTCHA validates and form submits.

Actual: reCAPTCHA fails with error.

Suggestion: Improve reCAPTCHA handling or allow retry without refreshing.

2. Form accepts invalid input

Steps to Reproduce: Enter 'abc@' in email field or use digits in name

Expected vs Actual: Expected: Validation error shown.

Actual: Form proceeds or silently fails.

Suggestion: Apply stronger validation rules for email, name, and phone fields.

3. Error messages too subtle

Steps to Reproduce: Submit the form empty or with wrong inputs

Expected vs Actual: Expected: Clear and prominent error display.

Actual: Small red text, easy to miss.

Suggestion: Use bold red text or toast messages for visibility.

4. Mobile layout issues

Steps to Reproduce: Open registration page on mobile view

Expected vs Actual: Expected: Clean and responsive form.

Actual: Buttons and fields overflow or overlap.

Suggestion: Fix mobile responsiveness using CSS media queries.

5. Autofill doesn't work well

Steps to Reproduce: Try Chrome autofill for email/phone fields

Expected vs Actual: Expected: Autofill works smoothly.

Actual: Fields behave inconsistently.

Suggestion: Test and fix compatibility with browser autofill behavior.

6. Buttons lack hover effect

Steps to Reproduce: Hover over sidebar items on dashboard

Expected vs Actual: Expected: Hover effect shows visual cue.

Actual: No change on hover.

Suggestion: Add simple hover styles (color, underline) to improve interactivity.

7. Non-working icons

Steps to Reproduce: Click 'Settings' or 'Upgrade' on sidebar

Expected vs Actual: Expected: Navigation or message shown.

Actual: No response or dead links.

Suggestion: Remove or fix dead icons; show tooltips or 'Coming soon'.

8. Dashboard not mobile-friendly

Steps to Reproduce: View dashboard on mobile screen

Expected vs Actual: Expected: Clean, scrollable layout.

Actual: Elements overlap or shrink badly.

Suggestion: Improve layout using grid/flexbox and test on small screens.

9. No tooltips for icons

Steps to Reproduce: Hover on sidebar or buttons

Expected vs Actual: Expected: Tooltip describes function.

Actual: Nothing appears.

Suggestion: Add tooltip text for better accessibility.

10. Layout shifts on load

Steps to Reproduce: Login and observe dashboard

Expected vs Actual: Expected: Smooth load.

Actual: Elements jump after 1-2 seconds.

Suggestion: Use loading spinner or skeleton layout to improve feel.

11. No 'Show Password' toggle

Steps to Reproduce: Try entering password on register page

Expected vs Actual: Expected: Option to reveal password.

Actual: Password hidden always.

Suggestion: Add visibility toggle (eye icon) for password field.

12. No confirmation message

Steps to Reproduce: Submit form with valid inputs

Expected vs Actual: Expected: Toast message or redirect confirmation.

Actual: Redirect only, no feedback.

Suggestion: Add short success message before redirection.

13. No first-time guide

Steps to Reproduce: Login as a new user and view dashboard

Expected vs Actual: Expected: Help or guidance shown.

Actual: Empty dashboard, no hints.

Suggestion: Add simple onboarding pop-up or demo content for new users.
